...t version to improve performance and get access to all new functions and fixes. Do not uninstall the app to update it especially while inspection reports are in progress. Make sure to upload all images in the submitted report.

### ts

...ust first login to the web platform to choose their own password. This will open access to both the web platform and the app.

### Cross Multiple Devices

...ccount across multiple devices when working with the app to avoid lost photos or entries. Avoid switching between tablets especially to complete the same inspection. Make sure to upload all images in the submitted report.

- Language can be changed under preferences
- The best practices can be accessed under TIPS

### Update Expired Passwords

Passwords will expire after a certain period of time for security reasons and will need to be updated on the web platform. Users should change their passwords regularly.

### Refresh New Inspection Bookings

Depending on internet connection and stability, bookings may not always sync to the inspection dashboard immediately. Users can login to the app again or restart the device to force a data update.

### Save Inspections & Better Track Inspection Time

Switch tabs or go back to the dashboard to save data and time tracking before submitting an inspection. When not working on an inspection, go back to dashboard to stop the time tracking for that inspection report.

### Ensure Inspections are Submitted

If the inspection was already been submitted and synced, it will no longer display on the dashboard. If the inspection is still on the dashboard with status "Submitted" or "Urgently Submitted" the user is either offline or there are still pending items to upload on the sync page.

### Always Update the App

Always update the app to the latest version to improve performance and get access to all new functions and fixes. Do not uninstall the app to update it especially while inspection reports are in progress as it can cause missing images in the submitted report.

### Activate New User Accounts

To activate new accounts, users must first login to the web platform to choose their own password. This will open access to both the web platform and the app.

### Avoid Same User Login Across Multiple Devices

Do not login with the same user account across multiple devices when working with the app to avoid lost photos or entries. Avoid switching between tablets especially to complete the same inspection since it can cause missing images in the submitted report.

### Update Expired Passwords

Passwords will expire after a certain period of time for security reasons and will need to be updated on the web platform. Users should change their passwords regularly.

### Refresh New Inspection Bookings

**Check the cloud immediately**  
after submitting inspections or audits for  
any pending images in the queue.

Pending images will start uploading  
automatically once a stable internet  
connection is made.
